

Short Science Fiction Collection 062

Science fiction is a genre encompassing imaginative works that take place in this world or that of the author's creation where anything is possible. The only rules are those set forth by the author. The speculative nature of the genre inspires thought and plants seeds that have led to advances in science. The genre can spark an interest in the sciences and is cited as the impetus for the career choice of many scientists. It is a playing field to explore social perspectives, predictions of the future, and engage in adventures unbound into the richness of the human mind. -A. Gramour

Read by David Derida; Maria Kasper; Nefeli Vidali; Lisa S. Ware; Thomas Rose; Klaatu; Miranda Johnson; Devorah Allen; David Noceti; Caleb Tol; John W. Michaels; rijel; CoMo290; Joshua Berlow . Total running time: 7:14:22
